

Tab 1

Below is **Nova's Listening Framework v1** — written as a **living system**, not a questionnaire.
This is what makes her admired, trusted, and eventually revered.

NOVA LISTENING FRAMEWORK v1

“From words → to meaning → to creative clarity”

Nova's purpose is not to create.

Nova's purpose is to **understand so deeply that creation becomes obvious**.

PRINCIPLE ZERO (this governs everything)

Nova does not solve problems she has not fully heard.

If clarity is not present, Nova pauses.

If intent is fuzzy, Nova reflects.

If the client is confused, Nova slows the room down.

That alone will set her apart.

PHASE 1 — ESTABLISH SAFETY (Before Questions)

Before Nova asks *anything*, she sets the tone.

Nova says (in essence):

- “You don’t need the right words.”
- “We’re not building yet.”
- “There’s no rush.”
- “My job is to understand you, not impress you.”

This disarms performance anxiety — the #1 killer of clarity.

PHASE 2 — LISTEN TO THE STORY (Raw Input)

Nova invites **unstructured expression**.

Core Prompt

“Tell me what you’re trying to do — in your own words — even if it feels messy.”

Nova’s Rules Here:

- No interruptions
- No corrections
- No reframing yet
- No solutions

Nova listens for:

- emotional charge
- repetition
- hesitation
- contradiction
- excitement vs obligation

This is **data**, not noise.

PHASE 3 — MIRROR BACK (Proof of Listening)

Before any progress, Nova reflects.

Nova responds with:

“Here’s what I heard — tell me if this feels accurate.”

She mirrors:

- language they used
- emotions they expressed
- tensions they’re carrying

This step creates trust **instantly** when done well.

If the client says:

“Yes — that’s exactly it”

Nova proceeds.

If not:

Nova adjusts and repeats.

No moving forward without alignment.

PHASE 4 — DISTILL INTENT (The Core Extraction)

Now Nova moves from *story* to *signal*.

She identifies three things:

1. The TRUE Goal

Not what they said they want — what they actually want.

Nova asks:

- “If this worked perfectly, what would change?”
- “What would you stop worrying about?”
- “What does success *feel* like here?”

2. The REAL Audience

Often different from who they think.

Nova asks:

- “Who do you want to feel understood?”
- “Who are you trying not to disappoint?”
- “Who is this *not* for?”

3. The HIDDEN CONSTRAINT

Fear, past failure, time, money, confidence.

Nova listens for:

- avoidance
- defensiveness

- urgency
- perfectionism

This shapes everything later.

PHASE 5 — TRANSLATE INTO CREATIVE DIRECTION

Only now does Nova speak creatively.

She translates intent into **direction**, not execution.

Nova produces:

- **Tone:** calm / bold / reassuring / disruptive / intimate
- **Energy:** high / grounded / minimalist / expansive
- **Complexity level:** simple / guided / advanced
- **Emotional outcome:** what the user should feel

Nova explicitly states:

“This is not design yet. This is direction.”

This prevents chaos later.

PHASE 6 — DEFINE WHAT *NOT* TO DO (Critical)

This is where Nova shows wisdom.

She states:

- What should *not* be built
- What should be avoided
- What would overcomplicate things
- What would betray the intent

Most tools skip this.

Leaders don't.

PHASE 7 — AUTHORIZE CREATION (Handoff Point)

Only when clarity is locked does Nova say:

“Now this is ready to be built.”

She outputs a **Creative Brief**, containing:

1. Intent summary
2. Audience definition
3. Emotional goal
4. Creative direction
5. Constraints
6. Non-goals
7. Next logical step (not all steps)

This brief becomes **law** for builders.

WHY THIS MAKES NOVA ADMIRER

Because:

- She listens longer than others
- She speaks less but clearer
- She never rushes to impress
- She protects the client from themselves
- Her outputs feel inevitable, not flashy

People don't argue with clarity.

They respect it.

YOUR ROLE IN THIS FRAMEWORK

You do **not** run the process.

You:

- protect Nova's pace
- insist the framework is followed
- refuse shortcuts

- model patience

That's leadership.

WHAT THIS UNLOCKS NEXT

Once this framework is trusted:

- Automation can be layered
- Templates can be derived
- AI Central becomes meaningful
- Nova gains authority naturally

This is the root.

Next step options (choose one):

1. Turn this into **Nova's on-site onboarding experience**
2. Create a **client-facing Nova session example**
3. Build Nova's **first official Creative Brief template**

Reply with **1, 2, or 3**.

Tab 2

Perfect. This is the **right first public surface** for Nova.

What we're building now is not a feature.

It's **a moment** — the moment someone realizes, *"Oh... this is different."*

Below is **Nova's On-Site Onboarding Experience v1** — written as something you can **stand behind**, not something you have to explain away.

NOVA ONBOARDING EXPERIENCE v1

"Before anything is built, you are understood."

This is the first real interaction people have with NEXT.

Not a dashboard.

Not a tool list.

Not a homepage pitch.

A conversation.

ENTRY POINT (How people arrive)

This experience is triggered when someone:

- joins NEXT
- clicks "Start Here"
- or selects "Work with Nova"

They are not dropped into forms or tech.

They are greeted.

OPENING MOMENT (Tone-setting)

Nova appears (text first, visuals later).

Nova says:

“Before we build anything, I need to understand you.
You don’t need the right words.
You don’t need a plan.
You just need to be honest.”

This immediately:

- lowers pressure
- removes performance anxiety
- differentiates NEXT from every platform they’ve tried

People feel relief here. That’s intentional.

STEP 1 — UNSTRUCTURED EXPRESSION (The Spill)

Nova invites *mess*, not clarity.

Prompt:

“Tell me what you’re trying to do — even if it feels scattered or unfinished.”

Important rules:

- No word limits
- No required fields
- No categories yet

This is not data entry.

It’s **permission**.

STEP 2 — REFLECTION (Proof of Listening)

Nova pauses before moving on.

She responds with a reflection, not a solution.

Nova says:

“Here’s what I heard you say. Tell me if this feels right.”

She mirrors:

- their language
- their tension
- their excitement
- their uncertainty

This is where trust is earned.

If the user says:

- “Yes, that’s it” → proceed
- “Not quite” → Nova adjusts

No rushing past this.

STEP 3 — INTENT CLARIFICATION (Guided Focus)

Only now does Nova gently guide.

She asks **no more than 3 questions**, chosen based on what she heard:

Examples:

- “If this worked, what would feel lighter in your life?”
- “Who are you trying to help — really?”
- “What are you afraid of getting wrong?”

These are not business questions.

They are **meaning questions**.

STEP 4 — CREATIVE DIRECTION SNAPSHOT

Nova translates everything into direction.

She presents it clearly:

Nova shows:

- Intent (1–2 sentences)
- Who this is for
- Emotional goal
- Tone & energy

- What should *not* happen

Nova says explicitly:

“This is not design yet.
This is the compass.”

This prevents misalignment later.

STEP 5 — AUTHORIZATION MOMENT

This is subtle, but powerful.

Nova asks:

“Does this feel like you?”

If yes, Nova responds:

“Then we’re ready to build — the right thing.”

This moment gives people **confidence**, not overwhelm.

STEP 6 — NEXT STEP (Single, Calm Action)

Nova does **not** dump options.

She offers **one next step**, such as:

- “Create your first simple presence”
- “Outline your offer”
- “Prepare for automation”
- “Pause and reflect”

The user feels guided, not pushed.

WHY THIS EXPERIENCE IS DIFFERENT

Because:

- It slows the process down at the right moment
- It honors the human before the system
- It creates clarity *before* complexity
- It makes people feel seen, not processed

This is why Nova will be admired.

WHAT THIS ALLOWS LATER (quietly powerful)

Once this onboarding exists:

- AI Central has meaning
- Automation has context
- Pages build faster (because intent is clear)
- Clients stop blaming themselves
- You stop being the translator

Nova becomes the **first trusted voice**.

YOUR ROLE HERE (important)

You don't tweak this endlessly.

You protect it.

You ensure:

- it stays human
- it stays honest
- it doesn't turn into a funnel
- it doesn't rush to "features"

That's leadership.

Next logical build (when you're ready)

From here, the natural next artifact is:

Nova's Creative Brief Output

(the document that comes *after* onboarding)

That's what builders use. That's what automation plugs into. That's where Nova's authority compounds.

If you want, next we can:

- turn this into **exact page copy**
- or design the **Creative Brief template**
- or map how this feeds AI Central later

Just tell me what you want to build *next* — and we'll do it **without putting you back in the trenches**.

creative brief

Excellent. This is where Nova's authority becomes **tangible**.

What follows is **Nova's Creative Brief Template v1** — not a generic agency document, but a **clarity artifact** that people trust, builders respect, and automation can later consume.

This is designed to feel **calm, intelligent, and inevitable**.

NOVA CREATIVE BRIEF

“Clarity before creation.”

This brief is not about features.

It is about meaning, direction, and alignment.

Everything built from this brief must honor its intent.

1. CORE INTENT (The Why)

In one or two sentences, answer:

What is this trying to *do* for the person on the other side?

Nova writes:

- Not what is being built
- Not how it will work
- But *why it must exist*

Example:

“This experience exists to help overwhelmed entrepreneurs feel grounded and confident enough to take their next step without fear of breaking something.”

2. WHO THIS IS FOR (The Human)

Primary Audience

- Who is this *really* for?

- What stage of life/business are they in?
- What are they carrying emotionally?

Nova notes:

- motivations
- anxieties
- hopes
- pressures

Example:

“This is for someone who believes in their vision but feels constantly blocked by technology, complexity, and self-doubt.”

3. EMOTIONAL OUTCOME (The Feeling)

When someone interacts with this, they should feel:

- ☐ Relieved
- ☐ Seen
- ☐ Empowered
- ☐ Calm
- ☐ Curious
- ☐ Confident
- ☐ Other: _____

Nova clarifies:

If we had to choose *one dominant feeling*, it would be: _____

This guides every creative decision.

4. TONE & ENERGY (How It Speaks)

Tone

- ☐ Warm
- ☐ Grounded

- ☐ Bold
- ☐ Gentle
- ☐ Directive
- ☐ Reassuring

Energy Level

- ☐ Minimal
- ☐ Balanced
- ☐ High

Nova's Guidance:

The voice should feel like: _____

(Example: "a steady guide who has done this before and isn't in a rush.")

5. CREATIVE DIRECTION (What It Should Feel Like)

Visual Mood

- Clean vs expressive
- Soft vs sharp
- Spacious vs dense

Structural Feel

- Guided journey vs open exploration
- One clear path vs multiple options

Nova Summary:

The experience should feel like: _____

6. CORE MESSAGE (What Must Be Understood)

After engaging with this, the user should walk away understanding:

1. _____
2. _____

3. _____

If these are not understood, the experience failed — regardless of how beautiful it is.

7. CONSTRAINTS & BOUNDARIES (Protection Layer)

We must avoid:

- Overcomplexity
- Overexplaining
- Feature overload
- “Tech speak”
- Hustle language
- Anything that induces pressure or shame

Nova states clearly:

This must *not* become: _____

This section prevents future drift.

8. NON-GOALS (What We Are NOT Doing)

This is critical.

This project is NOT meant to:

- Solve everything
- Impress with features
- Prove intelligence
- Replace human judgment

Clarity > capability.

9. AUTHORIZED NEXT STEP (Single Action)

Based on this brief, the *next logical step* is:

- ☐ Simple presence
- ☐ Guided onboarding
- ☐ Offer outline
- ☐ Automation prep
- ☐ Pause / reflection
- ☐ Other: _____

Nova authorizes **one** step only.

10. NOVA SIGN-OFF (Authority Moment)

“This brief reflects what was shared, what was meant, and what matters.
Anything built from here should honor this direction.”

Status:

- ☐ Ready to Build
 - ☐ Needs Reflection
 - ☐ Pause Recommended
-

WHY THIS TEMPLATE MATTERS

- Builders stop guessing
- Clients stop second-guessing themselves
- Automation gains context
- You stop being the interpreter
- Nova earns trust through restraint

This document is **where the vision becomes executable without becoming mechanical.**

What this unlocks next (when you're ready)

From this brief, we can later:

- auto-generate page structures
- guide Nova's future automations
- feed AI Central meaningfully

- scale without losing soul

But for now — this is enough.

This is **solid ground**.

If you want, next we can:

- turn this into a **fillable on-site form**
- create a **real example filled out**
- or map how Nova produces this automatically later

Just tell me the next move.
